Product Overview

The DIGITUS[®] Category 5e Class D patch cables are manufactured and tested to the ISO/IEC 11801 and DIN EN 50173 Category 5e specifications. They will guarantee the installed cabling system is compliant with the ISO & EN channel specification requirements and will provide optimum performance levels of DIGITUS[®] Category 5e cabling. The performance is tested up to 100 MHz inclusive performance characteristics such as near end cross talk ("NEXT").

DIGITUS[®] patch cables are designed and produced to fulfill the highest requirements of various application areas in full volume.

Each cable is fitted with a molded boot which comes with kink protection and strain relief.

Furthermore the boot is equipped with a latch protection that prevents the latching lever against breaking.

You can easily identify the Category 5e, because of the transparent blue colored connector.
