Fit for the future!

With this hub you can use the fast USB 3.0 for four devices with the new Type-C™ interface. The hub is buspowered so it is usable without power supply and the ideal extension on the move. USB 3.0 has a bandwidth of up to 5 Gbit/s. That makes it up to 10 times faster than USB 2.0. USB 3.0 is downwards compatible, it fits also USB 2.0 cables and devices (with lower transfer rates).

No more slots?

If you want to use your existing USB 3.0 devices on the latest mobile devices and laptops with a USB Type-C™ port this compact hub is a quick help. It uses a single USB 3.0 Type-C™ port on its own and creates four additional Type-A ports. Problem solved!

The new standard

USB 3.0 Type-C™ ports have two distinct advantages over the existing forms. They are smaller and therefore ideal for thin laptops and mobile devices and it is no longer necessary to insert the connector in a particular orientation. It always fits and thus saves the user a lot of small annoyances when connecting devices.

Simple and chic

The IB-HUB1409-C3 is made from aluminium and thus very light even if you are on the move. The look, however, does not lose in importance, the hub presents itself with a sand blasted surface.
