

## S80 RGB

With its 240 mm radiator, the S80 RGB is a compact all-in-one water-cooling system that provides efficient cooling for all CPUs. Apart from providing visual highlights in 16.7 million colors, the addressable RGB PWM fans also ensure good cooling performance with a speed of up to 2,000 rpm. Installation is easy, thanks to the flexible, textile-braided tubing and the supplied mounting brackets.

### Features

#### FULL FAN CONTROL

The two RGB PWM fans that belong to the S80 RGB's 240 mm radiator not only have fully addressable RGB illumination, but their speed can also be controlled within a range from 600 rpm to 2,000 rpm. And for easy cable management, the fans can be daisy chained. Also the pump has PWM control for optimal performance and low noise volume.

#### BEST POSSIBLE HEAT DISSIPATION

Like the fans, the water block and pump unit is also equipped with RGB illumination and presents itself with a chic infinity mirror effect. The copper plate and the supplied high-quality DOWSIL™ thermal paste ensure the best possible heat dissipation.

#### COMPATIBLE WITH ALL CPUS

Thanks to the two enclosed mounting brackets for CPUs of all manufacturers, this all-in-one water-cooling solution is optimally prepared for direct use in the PC case.

#### FLEXIBLE AND EASY TO INSTALL

Via the flexible tubing, installation in the PC case is as uncomplicated as possible. The tubing is textile braided for optimal protection against scratches.

#### ROTATABLE SHARKOON LOGO

In order to ensure that the Sharkoon logo is always horizontal, it can be easily rotated to the desired position on the water block and pump unit.
