(1)

Hardware Quick Reference LANCOM GS-2326+

\mathbf{O} Configuration interface

Connect the serial interface (Console) via the included serial configuration cable to the serial interface of the device you want to use for configuring / monitoring the switch.

 \bigcirc **TP Ethernet interfaces** Use Ethernet cables to connect the interfaces ETH 1 to ETH 24 to your PC or a LAN switch.

3 TP Ethernet interfaces (combo ports) Use Ethernet cables to connect the interfaces ETH 25 and ETH 26 to your end device or another LAN switch.

(4)

ATTENTION: High touch current possible! Connect to 6 earth before connecting the power supply.

Before initial startup, please make sure to take notice of the information regarding the intended use in the enclosed installation guide!

Operate the device only with a professionally installed power supply at a nearby power socket that is freely accessible at all times.

- \rightarrow Keep all ventilation slots on the side of the device clear of obstruction
- brackets.

(2)

3 4

SFP interfaces (combo ports)

Insert suitable LANCOM SFP modules into the SFP combo ports 25 and 26. Choose cables which are compatible with the SFP modules and connect them as described in the module's documentations.

Power connector and grounding point (device back side)

Supply power to the device via the power connector. Please use the IEC power cable supplied (separately available for WW devices).

€⊕ Warning! High touch current. Connect to earth before
