- 1 Put on the headset

Accepts a call/ Initiates an outgoing call

Ends a call

Rejects a call

Redials the last number

When in active call:
Holds/unholds call

OR

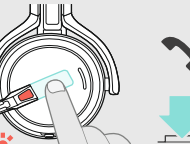

1 Initiate a call via headset or base station

The diagram shows three ways to initiate a call: a laptop with a headset, a corded telephone, and a smartphone. A finger is shown pressing a call button on a headset. A second sequence shows a finger pressing a call button on a corded telephone. A green arrow points down to a third sequence showing a finger pressing a call button on a smartphone. A separate illustration shows a finger pressing a call button on a headset connected to a laptop.

2 Dial the number or choose a contact

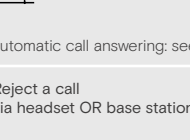

The diagram shows a laptop, a corded telephone, and a smartphone. A finger is shown pressing a call button on a headset connected to a laptop. A second sequence shows a finger pressing a call button on a corded telephone. A green arrow points down to a third sequence showing a finger pressing a call button on a smartphone.

A Accept the call
via headset OR base station*

* For automatic call answering: see DIP switch settings

C Reject a call
via headset OR base station

Answer/reject a 2nd call

The diagram shows a mobile phone interface with three call slots. The first slot is labeled 'call 1' and the second 'call 2'. A finger is shown interacting with the 'call 2' slot. Two options are shown:

- Accepts the incoming call & puts an active call on hold:** Indicated by a green arrow with a '2x' multiplier, showing the 'call 2' slot becoming active and the 'call 1' slot going on hold.
- Rejects the incoming call & continues the active call:** Indicated by a green arrow with a '1s' timer, showing the 'call 2' slot being rejected and the 'call 1' slot remaining active.

Mini conference call

The diagram shows a mobile phone interface with three call slots. A finger is shown interacting with the 'call 2' slot. Two options are shown:

- Merge a held call into an active call:** Indicated by a green arrow with a '2s' timer, showing the 'call 2' slot being merged into the 'call 1' slot.
- Unmerge a call and put it on hold:** Indicated by a green arrow with a '2s' timer, showing the 'call 2' slot being unmerged and put on hold.

voice prompts:

- "More than 80% battery left"
- "More than 60% battery left"
- "More than 40% battery left"
- "More than 20% battery left"
- "Less than 20% battery left"

below 15 min talk time:
automatic voice prompts: "Recharge headset"

Diagram illustrating the steps to connect the New MASTER headset to the phone:

1. Plug the New MASTER headset into the phone's audio port. The diagram shows the headset being inserted into the port, with a checkmark indicating the correct connection. A legend indicates that the blue plug is for 'New MASTER' and the red plug is for '2x'.

The diagram is divided into four main sections illustrating the connection process:

- 2a** Press & hold the mute button & insert the headset. A callout shows a headset being inserted into the base station. Text: "GUEST 1-3".
- 1** Press & hold the mute button & insert the headset. A callout shows a hand holding the headset. Text: "GUEST 1-3".
- 2** Press & hold the mute button & insert the headset. A callout shows a hand holding the headset. Text: "GUEST 1-3".
- 3** Press & hold the mute button & insert the headset. A callout shows a hand holding the headset. Text: "GUEST 1-3".
- 4** Repeat the GUEST headset. A callout shows a hand holding the headset. Text: "Repeat for further GUEST headsets."

Below the main steps, a section titled "Ready for conference call:" shows a base station connected to a telephone. A callout shows a hand holding the headset. Text: "Master headset & Guest headsets connected to the base station".

Below this, a section titled "Ends conference" shows a hand holding the headset. Text: "Ends conference".
