

AMD EPYC[™] 4004 SERIES PROCESSORS ATTRACTIVELY PRICED SOLUTIONS FOR GROWING BUSINESSES

AT A GLANCE

When you need high performance at an affordable price, AMD EPYC[™] 4004 Series processors are designed for you. These processors provide a wide range of performance, scalability, and efficiency that contribute to creating fast and practical solutions. Whether you are a small business, dedicated hosting provider, or a business technology provider, use EPYC 4004 processors to power turn-key, easy-to-use, and easily managed server solutions.

NEWEST MEMBER OF THE 4TH GEN AMD EPYC PROCESSOR FAMILY

AMD EPYC 4004 series processors leverage our hybrid, multi-chip architecture and 'Zen 4' CPU die to scale down to as few as four cores. With 4–16 cores, these CPUs can reach up to a sizzling 5.7 GHz, EPYC-018 aided by thermal design flexibility. Integrated with up to two eight-core CPU dies and an I/O die tailored to the needs of small business and dedicated hosters, they offer balanced performance. Each processor supports two DDR5-5200 channels, up to 28 PCIe[®] Gen 5 lanes, four USB Type C[®] ports, and an AMD Secure Processor. Built with the AM5 Type 2 form factor, it supports server management and is expandable with four chip-set options.

ATTRACTIVELY PRICED FOR LOW SYSTEM ACQUISITION COST

Deploy high-value, essential server solutions for growing businesses

Whether you are a small business, a hosting company providing dedicated servers, or a system integrator deploying integrated appliances, the AMD EPYC[™] 4004 Series can help you meet your business goals. Whether you care most about overall system price or cost per core, choosing the EPYC 4004 Series will help you deliver compelling results compared to the competition. For example, a 16-core server powered with a single AMD EPYC 4584PX enables you to fully use your base 16-core Microsoft Windows server license while delivering 67% more integer performance per estimated system dollar than servers with an 8-core Intel Xeon E-2488.

DESIGNED FOR FAST AND PRACTICAL SOLUTIONS

Provides the full range of features for everyday processing needs.

When you need a practical solution, choosing the EPYC 4004 Series gives you a wide range of performance, scalability, and efficiency needed by servers designed for everyday and all-day processing needs. From 4–16 cores, every CPU in the product line delivers the performance you can expect from our 'Zen 4' processor cores along with the I/O capacity and memory bandwidth to balance the system on chip's performance. The Phoronix Test Suite consists of more than 450 workloads. They score servers with a single 16-core EPYC 4564P CPU or a single 8-core EPYC 4364P at 57% or 15% faster, respectively, than servers with a single Xeon E-2488 CPU.

DEPENDABLE AND EASY TO USE

Upgrade to the EPYC 4004 Series for easy-to-use, compatible server solutions .

By choosing the established EPYC brand for enterprises, you can be confident in using the EPYC 4004 Series as the foundation for your growing business, hosting facility, or server appliance development. You can choose from a variety of solutions from key system vendors with a multi-year CPU lifecycle support from AMD. We engage with our partners with server design and BMC validation, software RAID, and chipset support. We've tested and validated the EPYC 4004 Series with the leading server operating systems, including Microsoft Windows[®] Server 2022, Red Hat[®] Enterprise Linux 9.3 and 9.4, SUSE[®] Linux[®] Enterprise Server 15 SP5, and Ubuntu[®] 22.04.
