iiyama | Servicecard

Dear user, we congratulate you on the purchase of your iiyama LCD.

For details on warranty and locally used pixel policies that apply directly after installation of your product please check the iiyama website.

To report a fault, please contact your local support centre found at https://iiyama.com

Things to check before you call the iiyama information line

| if the power cable is connected securely and turned on?

| if the display has been turned on?

| if the signal cable is connected securely and the correct input selected?

| if the computer has been restarted with the display connected?

| if the graphics card is correctly installed with the latest drivers possible?

| if the correct native resolution has been selected via 'Display Properties'?

| If the R/G/B signal configuration is correct?

| if the displays On Screen Menu is shown?

| if the correct brightness and contrast settings have been set?

| if given display tolerances and compatibility have been considered?

| if via the On Screen Menu you have performed a Factory Reset/Recall?

Before reporting the screen defect, please prepare the following information/evidence:

| model number *

| purchase receipt and serial number *

| name and address for collection

| telephone/fax number, for availability during the day

| convenient collection date (date, time)

| short description of the defect

Important Note:

If there is no fault found in the collected equipment after inspection, the transferring party shall incur charges for transport and administration.

If you have checked all of the above and there is still no picture, call our information line for assistance in your country.

Feedback on health and safety issues

If you have any health and safety concerns or questions about the product (including when using the product), please contact iiyama support through our website. You can also contact us by calling +31 204460404. After receiving your feedback, we will ask the responsible unit to handle it as soon as possible and a dedicated person will get back to you. Your feedback will also be recorded and incorporated into our evaluation for improvements.

* see the identification plate on the back of the case.

CE MARKING DECLARATION OF CONFORMITY

This LCD monitor complies with the requirements of the EC/EU Directive 2014/30/EU "EMC Directive", 2014/35/EU "Low Voltage Directive", 2009/125/EC "ErP Directive" and 2011/65/EU "RoHS Directive".

The electro-magnetic susceptibility has been chosen at a level that gives correct operation in residential areas, business and light industrial premises and small-scale enterprises, inside as well as outside of the buildings. All places of operation are characterised by their connection to the public low voltage power supply system.

IIYAMA CORPORATION: Wijkermeerstraat 8, 2131 HA Hoofddorp, The Netherlands

Model No. : PL8614U / PL7514U / PL6514U

We recommend recycling of used product. Please contact your dealer or iiyama service center. Recycle information is obtained via the Internet, using the address: https://iiyama.com
You can access the Web page of different countries from there.

TABLE OF CONTENTS

FOR YOUR SAFETY

SAFETY PRECAUTIONS

WARNING

STOP OPERATING THE MONITOR WHEN YOU SENSE TROUBLE
If you notice any abnormal phenomena such as smoke, strange sounds or fumes, unplug the monitor and contact your dealer or iiyama service center immediately. Further use may be dangerous and can cause fire or electric shock.

NEVER REMOVE THE CABINET
High voltage circuits are inside the monitor. Removing the cabinet may expose you to the danger of fire or electric shock.

DO NOT PUT ANY OBJECT INTO THE MONITOR
Do not put any solid objects or liquids such as water into the monitor. In case of an accident, unplug your monitor immediately and contact your dealer or iiyama service center. Using the monitor with any object inside may cause fire, electric shock or damage.

INSTALL THE MONITOR ON A FLAT, STABLE SURFACE
The monitor may cause an injury if it falls or is dropped.

DO NOT USE THE MONITOR NEAR WATER
Do not use where water may be splashed or spilt onto the monitor as it may cause fire or electric shock.

OPERATE UNDER THE SPECIFIED POWER SUPPLY
Be sure to operate the monitor only with the specified power supply. Use of an incorrect voltage will cause malfunction and may cause fire or electric shock.

PROTECT THE CABLES
Do not pull or bend the power cable and signal cable. Do not place the monitor or any other heavy objects on the cables. If damaged, the cables may cause fire or electric shock.

ADVERSE WEATHER CONDITIONS
It is advisable not to operate the monitor during a heavy thunder storm as the continual breaks in power may cause malfunction. It is also advised not to touch the plug in these circumstances as it may cause electric shock.

ENGLISH

CAUTION

INSTALLATION LOCATION
Do not install the monitor where sudden temperature changes may occur, or in humid, dusty or smoky areas as it may cause fire, electric shock or damage. You should also avoid areas where the sun shines directly on the monitor.

DO NOT PLACE THE MONITOR IN A HAZARDOUS POSITION
The monitor may topple and cause injury if not suitably located. Please also ensure that you do not place any heavy objects on the monitor, and that all cables are routed such that children may not pull the cables and possibly cause injury.

MAINTAIN GOOD VENTILATION
Ventilation slots are provided to keep the monitor from overheating. Covering the slots may cause fire. To allow adequate air circulation, place the monitor at least 10 cm (or 4 inches) from any walls. Operating the monitor on its back, side, upside down or on a carpet or any other soft material may also cause damage.

DISCONNECT THE CABLES WHEN YOU MOVE THE MONITOR
When you move the monitor, turn off the power switch, unplug the monitor and be sure the signal cable is disconnected. If you do not disconnect them, it may cause fire or electric shock.

UNPLUG THE MONITOR
If the monitor is not in use for a long period of time it is recommended that it is left unplugged to avoid accidents.

HOLD THE PLUG WHEN DISCONNECTING
To disconnect the power cable or signal cable, always pull it by the plug. Never pull on the cable itself as this may cause fire or electric shock.

DO NOT TOUCH THE PLUG WITH WET HANDS
Pulling or inserting the plug with wet hands may cause electric shock.

WHEN YOU INSTALL THE MONITOR ON YOUR COMPUTER
Be sure the computer is strong enough to hold the weight of the monitor, otherwise, you may damage your computer.

OTHERS

ERGONOMIC RECOMMENDATIONS
To eliminate eye fatigue, do not operate the monitor against a bright background or in a dark room. For optimal viewing comfort, the monitor should be just below eye level and 40-60 cm (16-24 inches) away from your eyes. When using the monitor over a prolonged time, a ten minute break every hour is recommended as looking at the screen continuously can cause eye strain.

SPECIAL NOTES ON LCD MONITORS

■ The following symptoms are normal with LCD monitors and do not indicate a problem.

NOTE
- When you first turn on the LCD monitor, the picture may not fit in the display area because of the type of computer that is used. In this case, adjust the picture position to the correct position.
- You may find slightly uneven brightness on the screen depending on the desktop pattern you use.
- Due to the nature of the LCD screen, an afterimage of the previous screen may remain after switching the image, when the same image is displayed for hours. In this case, the screen is recovered slowly by changing the image or turning off the Power Switch for hours.

■ This LCD cannot be used outdoors.

■ This LCD cannot be used with the screen facing upwards.

■ If you use a cable longer than the supplied one, the picture quality is not guaranteed. Touch function can be disrupted if the USB cable length exceeds 3m.

ENGLISH

USAGE CONFIRMATION

The display is compatible for usage in Landscape applications.

IMAGE PERSISTENCE / IMAGE STICKING

Please be aware that all LCD screens can experience Image Persistence or Image Sticking. This occurs when a residual image remains visible on a screen when static images are displayed for long periods of time. LCD Image Persistence is not permanent but constant images being displayed for a long period of time should be avoided.

To counteract Image Persistence, turn off the monitor for as long as the previous image was displayed, so if an image was on the monitor for 1 hour and there is evidence of a residual or "ghost" image, you should turn off the monitor for 1 hour in order to clear the residual image.

For all LFD products, iiyama recommends displaying moving images and utilising a moving screen saver at regular intervals whenever the screen is idle. You could also turn off the monitor when not in use to assist the prevention.

Other ways to reduce the risk of Image Persistence will be to utilise the FAN-on function (if available), Low Backlight and Low Brightness settings.

FOR EXTENDED USE AS A PUBLIC DISPLAY

■ Image Sticking on LCD Panel
When a static image is displayed for hours, an electric charge trace remains near the electrode inside the LCD producing a "ghost" image. (Image Persistence).

Image Persistence is not a permanent feature.

■ Recommendations
To prevent Image Sticking and promote longer life expectancy of display, we recommend the following:

1. Avoid static images displayed for long periods – change static images on continuous loop.
2. Turn off monitor when not in use, either by remote control or use Standby or Schedule functions.
3. Check the Monitor Menu Settings for "Pixel Shift" etc. and activate it when available. This will reduce the Image Sticking Effect.
4. When monitor is installed in high ambient temperature environment(s) or in an enclosed position, utilise the Cooling Fan, Screen Saver and Low Brightness functions.
5. Suitable ventilation for any monitor is an expectation of any installation – climate control systems may need to be employed.
6. We strongly recommend utilisation of active cooling with fans for long operation times or high ambient temperature environments.

CUSTOMER SERVICE

NOTE
■ If you have to return your unit for service and the original packaging has been discarded, please contact your dealer or iiyama service center for advice or replacement packaging.

CLEANING

WARNING
■ If you drop any materials or liquids such as water into the monitor when cleaning, unplug the power cable immediately and contact your dealer or iiyama service center.

CAUTION
■ For safety reasons, turn off the power switch and unplug the monitor before you clean it.

NOTE
■ To protect the LCD panel, do not scratch or rub the screen with a hard object.
■ Never use any of the following strong solvents. These will damage the cabinet and the LCD screen.

Thinner	Benzine	Abrasive cleaner
Spray-type cleaner	Wax	Acid or Alkaline solvent

■ Touching the cabinet with any product made from rubber or plastic for a long time may cause degeneration or loss of paint on the cabinet.

CABINET
Stains can be removed with a cloth lightly moistened with a mild detergent solvent. Then wipe the cabinet with a soft dry cloth.

LCD SCREEN
Periodic cleaning with a soft dry cloth is recommended.
Don't use tissue paper etc. because these will damage the LCD screen.

BEFORE YOU OPERATE THE MONITOR

FEATURES

◆ **Supports Resolutions up to 3840 × 2160**

◆ **High Contrast 4000:1 (Typical: without glass) / Brightness 435cd/m^2 (Typical: without glass) : ProLite TE8614MIS / ProLite TE6514MIS**

◆ **High Contrast 5000:1 (Typical: without glass) / Brightness 435cd/m^2 (Typical: without glass) : ProLite TE7514MIS**

◆ **Digital Character Smoothing**

◆ **Automatic Set-up**

◆ **USB Type-C / RJ45 Connectors**

◆ **USB Power Delivery supports up to 100W**

◆ **2 × 8W + 2 × 18W (Typical) Stereo Speakers**

◆ **VESA Mounting Standard (800mm×600mm) Compliant : ProLite TE8614MIS**

◆ **VESA Mounting Standard (800mm×400mm) Compliant : ProLite TE7514MIS**

◆ **VESA Mounting Standard (600mm×400mm) Compliant : ProLite TE6514MIS**

◆ **Glass with AG coating**

CHECKING THE CONTENTS OF THE PACKAGE

The following accessories are included in your package. Check to see if they are enclosed with the monitor. If anything is missing or damaged, please contact your local iiyama dealer or regional iiyama office.

■ Power Cable*   ■ HDMI Cable   ■ Touch USB Cable
■ Remote Control   ■ Battery (2pcs)   ■ Touch Pen (Dual head: 4pcs)
■ Cable ties (For cable management, 6pcs)   ■ Mounting bracket for webcam (1set)
■ Mounting bracket for NUC   ■ Safety Guide   ■ Quick Start Guide

CAUTION * All guarantees and warranties are void for any problems or damage caused by a power cable not supplied by iiyama.
An approved power cable greater or equal to H05VVF, 3G, 0.75mm^2 must be used.

UNPACKING

CAUTION

Moving the monitor requires at least two people. If not, it may drop and could result in a serious injury.

SPECIAL NOTES ON THE TOUCH PANEL

CAUTION

Permanent damage can occur if Sharp Edged, Pointed or Metal items are used to activate Touch.
This could invalidate any remaining warranty.
We recommend you use a plastic stylus (tip ø2mm or over) or finger.

CAUTION

■ Follow the manual instructions for the type of mount you have selected. Refer all servicing to qualified service personnel.

■ Moving the monitor requires at least two people.

■ Before installation, please make sure the wall is strong enough to hold the necessary weight of the display and the mount.

ENGLISH

[WALL MOUNTING]

Screw

Mounting Stage

L

Chassis

CAUTION

When using the wall mounting, consideration of thickness of the mounting stage needs to be taken. Tighten the M8 Screws (4pcs) which "L" length is 25mm to fasten the monitor. Using a screw longer than this may cause electric shock or damage because it may contact with the electrical parts inside the monitor.
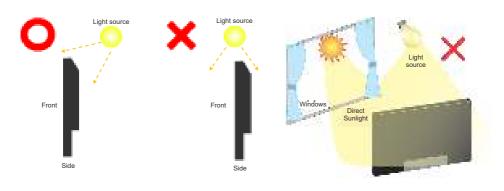

[INSTALLATION NOTE]

The touch kit of this monitor is an optical device that utilizes infrared light source and sensitive sensors for touch detection.

Notice the incident light that contains large quantities of infrared light may affect touch screen operation and performance.

Please install it with care as follows to ensure reliable touch performance.
Intense light / Specular light / Focus spotlight / Wide spread light / Direct sunlight / Indirect sunlight from the window and/or the glass door. / Not install the touch monitor right under the light source.

[ROTATING THE DISPLAY]

It is designed to be compatible in landscape mode.

PREPARING THE REMOTE CONTROL

To use the remote control, insert the two dry batteries.

CAUTION

- Do not use any other batteries other than those specified in this manual for the Remote Control.
- Do not insert old and new batteries together in the Remote Control.
- Make sure that the terminals match the "+" and "-" indications in the battery compartment.
- Remove the dead batteries immediately to prevent them from liquid leaking into the battery compartment.
- Burst batteries or the electrolyte from these batteries may cause stains, fire or injury.

① Open back cover of battery component on the back of remote control.

② Align and insert two AAA batteries according to their plus and minus ports (as indicated in the remote control).

Battery x 2

③ After battery is installed, close the back cover of battery components, and make the following clip buckled to the bottom.

■ Refer to the above instructions when taking out the batteries.

■ Replace with new batteries when the Remote Control does not work close to the monitor. Use AAA dry batteries. Risk of explosion if battery is replaced by an incorrect type.

■ Operate the Remote Control by pointing it toward the Remote Sensor on the monitor.

■ Other manufacturers remote control will not work with this monitor. Use the provided Remote Control ONLY.

■ Used batteries needed to follow the city rule to be discarded. (suggestion: to dispose of used batteries please follow correct policy as per your council regulations)

■ Batteries shall not be exposed to excessive heat such as sunshine, fire or the like.

■ If you do not intend to use the remote control for a long period, remove the batteries.

ENGLISH
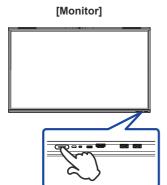

BASIC OPERATION

■ **Turning the monitor ON**

The monitor is turned On and the Power Indicator turns to White when you press the Power Button on the monitor or the Remote Control. The monitor is turned Off and the Power Indicator turns to Red when you press the Power Button on the monitor or the Remote Control. Press again to turn On the monitor.

NOTE

Even when using the standby mode or turning OFF the Power Switch, the monitor will consume a small amount of electricity. Turn OFF the Power Switch or disconnect the Power Cable from the power supply whenever the monitor is not in use or during the night, to avoid unnecessary power consumption.

[Monitor]   **[Remote Control]**

■ **Display the adjustment menu page**

The menu page appears on the screen when you press the Menu Button on the Remote Control.

The menu page disappears when you press the Back Button on the Remote Control.

[Remote Control]

ENGLISH

■ **Move the cursor vertically**

Select adjustment by pressing the ▲ / ▼ Button on the remote control while the menu page is displayed on the screen.

[Remote Control]

■ **Move the cursor horizontally**

Select menu or setting, or perform the adjustment by pressing the ◀ / ▶ Button on the remote control while the menu page is displayed on the screen.

[Remote Control]

■ **Adjust the volume of sound**

Press the VOL- / VOL+ Button on the remote control to adjust the volume of sound when the menu page is not displayed on the screen.

[Remote Control]

■ **Switch the input signal**

The Input setting menu appears on the screen when you press the Input Button on the remote control.
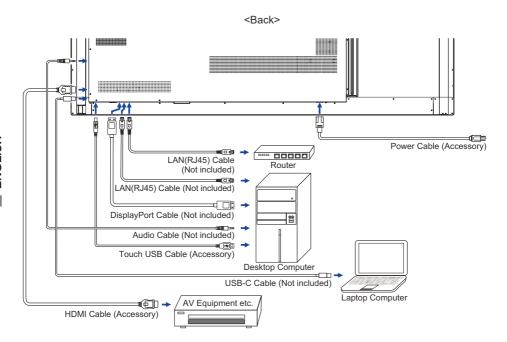

[Remote Control]

CONNECTING YOUR MONITOR

① Ensure that both the computer and the monitor are switched off .
② Connect the computer to the monitor with the signal cable.
③ Connect the computer to the monitor with the Touch USB Cable.
④ Connect the computer to the monitor with the USB Type-C Cable when viewing images on your monitor through the USB Type-C Connector or when using the monitor's USB hub function.*
⑤ Connect the Power Cable to the monitor first and then to the power source.
⑥ Turn on your monitor (Main Power Switch and Power Button) and computer.

* ● When charging connected device via USB Type-C Connector, check if the device is equipped with a USB Type-C Connector that supports charging function via USB PD (=Power Delivery).

● The connected device can be charged via USB Type-C Connector even when the monitor is in standby mode.

● The USB power delivery is up to 100W. If the connected device required more than 100W for operation or for boot up (when the battery is drained), use the original power adapter that came with the device.

● If a separately purchased USB Type-C Cable is used, make sure the cable is certified by USB-IF and is full-featured with power delivery and video / audio / data transfer functions.

● USB C to A cable is not included with the monitor. If you use a USB C to A cable, please note that you can only transfer data.

● Compatibility with all connected devices is not guaranteed due to different user environments.

NOTE ■ Make sure that the building installation has a circuit breaker of 120/240V, 20A (maximum).

■ The signal cables used for connecting the computer and monitor may vary with the type of computer used. An incorrect connection may cause serious damage to both the monitor and the computer. The cable supplied with the monitor is for a standard connector. If a special cable is required please contact your local iiyama dealer or regional iiyama office.

■ Make sure you tighten the finger screws at each end of the Signal Cable.

■ The touch function is ready for use about 5 seconds after connecting the USB cable and can be operated with a pen, finger or any other pointer.

■ The Class I pluggable equipment Type A must be connected to protective earth.

■ The socket-outlet shall be installed near the equipment and shall be easily accessible.

■ Excessive sound pressure from ear-/headphones can cause hearing damage/hearing loss.

OPERATING THE MONITOR

To create the best picture, your iiyama LCD monitor has been preset at the factory with the COMPLIANT TIMING shown on page 60. You are also able to adjust the picture by following the button operation shown below.

① **Take middle point position on the buttom of display screen as starting point, use the touch pen to drag towards screen center position to call up source menu as shown below. You can also access the Menu by clicking 🔳 on the navigation toolbar or press Input Button on the remote control.**

Screen center

② **Start the On Screen Display feature. There are additional Menu items which can be switched by using the ▲ / ▼ Buttons on the remote control or with the touch pen.**

③ **Select the Menu item of the adjustment you want to make. Press the ▶ button. Then, use the ▲ / ▼ Buttons on the remote control or with the touch pen to highlight the desired adjustment item. Then, press the Enter button on the remote control.**

④ **Use the ◀ / ▶ Buttons on the remote control or with the touch pen to make the appropriate adjustment or setting.**

⑤ **Press the Back Button on the remote control or click blank area outside menu with the touch pen to exit menu.**

For example, to correct for brightness, select Menu item of "Display". Select "Brightness" by using the ▲ / ▼ Buttons on the remote control or with the touch pen.
Use the ◀ / ▶ Buttons on the remote control or with the touch pen to change the brightness settings. The brightness of the overall display should be changing accordingly while you are doing this.

Press the Back Button on the remote control or click blank area outside menu with the touch pen, it ends, all changes are saved in the memory.

NOTE

■ The Back Button on the remote control can be used to return previous menu item.
■ Any changes are automatically saved in the memory when the On Screen Display disappears. Turning off the power should be avoided while using the Menu.
■ Adjustments for Image Position and Phase are saved for each signal timing. Except for these adjustments, all other adjustments have only one setting which applies to all signal timings.

Direct * Available for Remote Control only.

● **Freeze Function:**
Press the Blue button when Menu is not displayed.
Repeat successively to activate/deactivate the function.

● **Backlight Function:**
Press the Screen Off button when Menu is not displayed.
Repeat successively to On/Off the function.

● **Input Function:**
Press the Input Button when Menu is not displayed.

● **Volume Function:**
Press the VOL+/VOL- Buttons when Menu is not displayed.

● **Mute Function:**
Press the 🔇 Button when Menu is not displayed.
Repeat successively to On/Off the function.

● **Kiosk Mode Function:**
Disable touch functions, buttons, Menu etc.
Turn off "iiWare Enable" in Debug menu (Input + 2580)

[LOCK MODE] * Available for Remote Control only.

● **Front Power Button:**
Press the Green Button when Menu is not displayed, will lock/unlock the Front Power Button.

● **Touch function:**
Press the Yellow Button when Menu is not displayed, will lock/unlock the Touch function.

● **Front Power Button & Touch function:**
■ Press the Red Button when Menu is not displayed, will lock/unlock the Front Power Button and Touch function.

\<How to use AirClass\>

① The teacher click the ⬚ AirClass.

② Use the device to scan the QR code. (device: Android and mobile device on the same network) The students can also join the class by entering the URL in browser.

③ After all students have joined the class, click "ENTER THE CLASS".

④ Answer

    1. The teacher write a question on the note and click the Voter.

    2. The teacher select Single Choice Mode or Multiple Choice Mode.

    3. The number of students who are logged in is displayed. Then click BEGIN.

    4. After the student submitted the answer, the teacher can click "Finish", and the answer's statistics data will be shown on the screen.

    5. Teacher selects the correct answer on the screen; the correct answer will be green coloured, and the wrong answer will be red coloured.

⑤ Respoder

After teacher clicks the Responser. The 1st student who clicks the "Be Fast"icon the Notebook/Smartphone will be selected.

⑥ Selector

The teacher can click on the Selector to randomly select one student to answer the questions.

⑦ Message

    1. The teacher can enable the Message function to allow students' messages be presented on the screen.

    2. The students write their own opinions on their Notebook or Smartphone and click to Send.

Student message

⑧ Manager

The teacher can click the Manager to display the QR code to let other students to enter the class at any time.

<How to use Display center>

① Click the ▦ Display certer.

This function is to identify the connection to exernal monitor with HDMI OUT or Type C OUT.
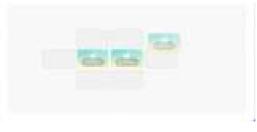

② Pop-up window.

③ Display settings

Manager:

Choose your desired modes for multi-monitor displays : Duplicate or Extend.

Layout:

Press and hold (or click) the display, then drag to rearrange the position.

④ Extend Mode

App toggle:

Select a background app and move to a monitor to use the app on that monitor.

[Note]

This is a writing software.

Can write the characters, Lines and pictures like a whiteboard. Also, can insert an image or file.

Click ▦ with the touch pen.

- Tools -

Menu: Display menu of Note.

 New: Save the Note writing and open a new Note.

 Open: Open the file.

 Save: Save the current document to image format to file browser.

 Save as: Save the current document to a new location with the same name or a different title.

 Import: Import the picture. (IMG/PDF/SVG)

 Export : Export as IMG/PDF/SVG/IWB.

 Cloud Storage: Google Drive / One Drive

  Save to Cloud Drive

  Users can save notes and annotations in Note directly to one of the cloud drives by clicking on the Cloud Storage icon in the menu. To change the way files are saved to the Cloud Drive, users can select two options in the cloud storage overview.

  Use the default account

  When checked, all notes will be saved automatically to the default Cloud Drive. Users will not be able to select a cloud drive.

  Use the default file name when save

  When checked, all notes will be saved to the selected Cloud Drive with the default file name. Users will not be able to (re)name the file.

 Theme: Change the color of the background.

 Send Email: Send the captured image by Email.

 Settings:

  Eraser mode: Eraser / Erase selection

  Palm rejection disabled/enabled:

  Enabled: When enabled, ignores the palm resting on the screen.

  Multi-finger writing disabled/enabled:

  Multi-finger is allowed when turned on, and multi-finger is preview when turned off.

  Automatic brightness disabled/enabled:

  Enabled: Reducing the brightness automatically when writhing the Note.

  Customise toolbars: You can customize the toolbar by choosing tool from "Customize toolbar"

Exit: Return to main screen.

Share: Share Note

 Users can scan the QR code with a smartphone and download the annotation image to a smartphone.

List: List up all the opened Notes.

Select: Select the object being edit, can move, can zoom.

Pen: Customize the color of your pen while handwriting.

 Change the width and color of the stroke. (Pen/Handwriting size/Handwriting color)

Eraser: Erase the specified object.

Clean All: Erase the all object.

My Files

"My files" folder will be created in your OneDrive or Google Drive once connected to your iiyama account.

Public Cloud (Google Drive / One Drive)

Save to Cloud Drive

Users can save notes and annotations in Note directly to one of the cloud drives by clicking on the Cloud Storage icon in the menu. To change the way files are saved to the Cloud Drive, users can select two options in the cloud storage overview.

Use the default account

When checked, all notes will be saved automatically to the default Cloud Drive. Users will not be able to select a cloud drive.

Use the default file name when save

When checked, all notes will be saved to the selected Cloud Drive with the default file name. Users will not be able to (re)name the file.

Remote File

Support access to SAMBA(SMB1.0) and FTP server.

[Browser (Web Browser)]

Connect the network, and browse the web.

Click 🟦 with the touch pen.

[Camera]

Take photos and record videos.

Click 📷 with the touch pen.

[Clock]

Set alarms, check the time, and use a stopwatch and timer.

Click 🕐 with the touch pen.

[Cloud Drive]

Connect the network, and the Cloud Drive.

Click 🗂 with the touch pen.

[Contacts]

Manage phone numbers, emails, and addresses.

Click 📇 with the touch pen.

[iiyama Account]

This is a single sign-on authentication scheme for customer identity and access management.

Click ⚏ with the touch pen.

[iiyama DMS]

This software provides organizations with a convenient and fast unified management solution for terminal equipment, builds an efficient and real-time equipment management system, helps digitize the campus environment and makes campus management more convenient.

Click 🖥 with the touch pen.

[iiyama Share]

This is the software that can wirelessly share the screen with other notebook etc..

Click ⠂ with the touch pen.

[Keeper]

This is the software to clean up the running application.

Double click 🧹 with the touch pen.

One Key Optimize : Memory and Garbage clean
Memory Clean : Clean memory
Garbage Clean : Clean storage

[Palette]

This is an illustration writing software.

Click 🎨 with the touch pen.
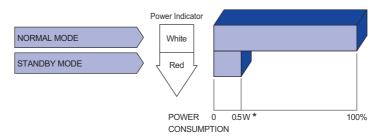

[Visualizer]

Visualizer is an app that allows users to connect webcam or visualizer(document camera) for capturing live instructions or physical materials and then projecting them onto a display for viewing and annotating.

Click 📷 with the touch pen.

STANDBY FEATURE

■ **Standby Mode**

When the video signal from the computer is off, the monitor enters into Standby Mode which reduces the power consumption to less than 0.5W*. The screen becomes dark, and the power indicator turns to red. From Standby Mode, the image reappears in several seconds when either the keyboard or the mouse are touched again.

	Power Indicator	
NORMAL MODE	White	
STANDBY MODE	Red	

POWER CONSUMPTION 0   0.5W *   100%

* When the USB devices are not connected.

TROUBLE SHOOTING

If the monitor fails to operate correctly, please follow the steps below for a possible solution.

1. Perform the adjustments described in OPERATING THE MONITOR, depending on the problem you have. If the monitor does not get a picture, skip to 2.
2. Consult the following items if you cannot find an appropriate adjustment item in OPERATING THE MONITOR or if the problem persists.
3. If you are experiencing a problem which is not described below or you cannot correct the problem, discontinue using the monitor and contact your dealer or iiyama service center for further assistance.

Problem	Check
① The picture does not appear. (Power indicator does not light up.)	□ The Power Cable is firmly seated in the socket. □ The Power Switch is turned ON. □ The AC socket is live. Please check with another piece of equipment.
(Power indicator is white.)	□ If the blank screen saver is in active mode, touch the keyboard or the mouse. □ Increase the Contrast and/or Brightness. □ The computer is ON. □ The Signal Cable is properly connected. □ The signal timing of the computer is within the specification of the display.
(Power indicator is red.)	□ If the monitor show "No Signal", touch the keyboard or the mouse. □ The computer is ON. □ The Signal Cable is properly connected. □ The signal timing of the computer is within the specification of the display.
② The screen is not synchronized.	□ The Signal Cable is properly connected. □ The signal timing of the computer is within the specification of the monitor.
③ The screen position is not in the center.	□ The signal timing of the computer is within the specification of the monitor.
④ The screen is too bright or too dark.	□ The video output level of the computer is within the specification of the monitor.
⑤ The screen is shaking.	□ The power voltage is within the specification of the monitor. □ The signal timing of the computer is within the specification of the monitor.
⑥ No sound.	□ The audio equipment (computer etc.) is ON. □ The Audio Cable is properly connected. □ The Volume is turned up. □ The Mute is OFF. □ The audio output level of the audio equipment is within the specification of the monitor.
⑦ The sound is too loud or too quiet.	□ The audio output level of the audio equipment is within the specification of the monitor.
⑧ A strange noise is heard.	□ The Audio Cable is properly connected.

Problem	Check
⑨ The touch screen shows no response.	☐ The USB Cable is firmly seated in the socket. ☐ Touch screen driver software is installed.
⑩ The touch position does not deviate.	☐ The calibration function set up correctly.

RECYCLING INFORMATION

For better environment protection please don't dispose your monitor.
Please visit our web site: https://iiyama.com for monitor recycling.

APPENDIX

Design and specifications are subject to change without prior notice.

SPECIFICATIONS : ProLite TE8614MIS-B2AG

Touch Screen	Technology	Android: 40points touch Windows: 50points touch
	Light transmission	92%
	Hardness	7H
	Thickness	3mm
	Communication system	USB serial transfer
	Response time	≤2.5ms
Size Category		86"
LCD Panel	Panel technology	VA
	Size	Diagonal: 85.6" (217.43cm)
	Pixel pitch	0.4935mm H × 0.4935mm V
	Brightness	400cd/m^2 (Typical: with Glass), 435cd/m^2 (Typical: without Glass) 325cd/m^2 (Default / Energy Saving)
	Contrast ratio	4000 : 1 (Typical: without glass)
	Viewable angle	Horizontal : 89 degrees, Vertical: 89 degrees (Typical)
	Response time	6.5ms (Typical, Gray to Gray)
Display Colors		Approx.1.07B
Sync Frequency		HDMI1/2/3/4: Horizontal: 30.0-135.0kHz, Vertical: 24-60Hz DisplayPort: Horizontal: 23.97-135.0kHz, Vertical: 24-30Hz USB-C IN: Horizontal: 30.0-135.0kHz, Vertical: 24-60Hz
Native Resolution		3840 × 2160, 8.3 MegaPixels
Supported max. resolution		HDMI1/2/3/4: 3840 × 2160 60Hz (YUV420/RGB444/YUV444) DisplayPort: 3840 × 2160 30Hz USB-C IN: 3840 × 2160 60Hz
Input Connector		HDMI ×4, DisplayPort ×1, USB-C ×2
USB Standard		USB2.0 (DC5V, 500mA) ×1 (for software update) USB3.2 Gen1 (5Gbps, DC5V, 900mA) ×4 (Front: 2, Side: 2) Type C 2 (3.2 Gen1 5Gbps, 5V, 3A / 9V, 3A / 15V, 3A / 20V, 3.25A / 20V, 5A) ×1 (DisplayPort 1.2 ALT mode/Touch/Power Delivery 100W*[1]) Type C 1 (3.2 Gen1 5Gbps, 5V, 3A) ×1 (DisplayPort 1.2 ALT mode/Touch/Power Delivery 15W) Type C OUT (3.2 Gen1 5Gbps, 5V, 1A) ×1 (DisplayPort 1.2 ALT mode/Touch/Power Delivery 5W)
Number of USB Ports Connector shape		3 : Type C 2 Upstream : Type B (for touch) 5 Downstream : Type A
Input Audio Connector		ø 3.5mm mini jack (Stereo)
LAN		RJ45 ×2 (in/out)
Serial Port		RS-232C In
Input Sync Signal		Separate sync: TTL, Positive or Negative
Input Video Signal		HDMI, DisplayPort, USB-C 3.1 Gen1 (DisplayPort 1.2)

Input Audio Signal	2.0Vrms maximum
Output Connector	HDMI 3840 × 2160 60Hz USB-C 3840 × 2160 60Hz
SPDIF out Connector	SPDIF
Output Audio connector	ø 3.5mm mini jack (Stereo)
Speakers	Internal: 8W ×2 (Facing forward) + 18W ×2 (Facing upward) (Stereo speakers)
iiWare Version	V12E (Android 13 OS)
Maximum Screen Size	1895.0mm W × 1066.0mm H / 74.6" W × 42.0" H
Power Source	100-240VAC, 50/60Hz, 6.0A
Power Consumption*²	267W (Default / Energy Saving) Standby Mode: 0.5W maximum, Off mode: 0.3W maximum
Dimensions / Net Weight	1957.0 × 1171.0 × 86.0mm / 77.0 × 46.1 × 3.4" (W×H×D) 63.6kg / 140.1lbs

Environmental Considerations	Operating: Temperature 0 to 40°C / 32 to 104°F
	               Humidity 10 to 90% (No condensation)
	Storage: Temperature -20 to 60°C / 4 to 140°F
	               Humidity 10 to 90% (No condensation)

Approvals	CE, UKCA, EAC, TÜV-Bauart

NOTE   *¹ Only available when the OPS is unplugged; otherwise it will back to 65W.

        It needs a full-function type C-C cable with EMARK certification.

     *² When the USB devices are not connected.

Touch Screen	Technology	Android: 40points touch Windows: 50points touch
	Light transmission	92%
	Hardness	7H
