Best illumination angle

Best time of the day

Do not leave out in the rain

The solar panel doesn't work behind a window

When charging for the first time we recommend that you charge the Solar Charger by USB with the included cable.

Also, when the internal battery of the Solar Charger is completely empty, you may have to charge it by USB power for a few minutes. Sometimes the charger needs a small energy boost before being able to generate solar power into energy.

7

LED POWER INDICATORS

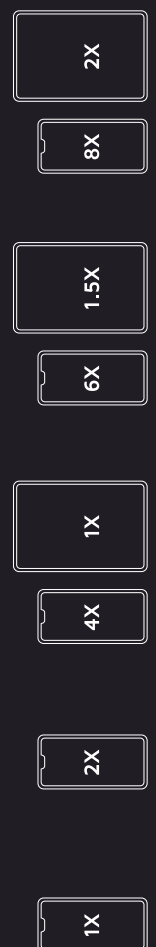

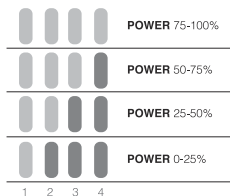

POWER BUTTON

**CHARGING INDICATION:**  
Press button 1x

**FLASHLIGHT ON:**  
Long click (3 seconds) on button

**FLASHLIGHT OFF:**  
Click twice on button
